TECHNICAL DATA SHEET

SIMGLO-440 **HIGH PERFORMANCE FLUORESCENT ENAMEL**

DESCRIPTION: Simglo-440 is an alkyd based premium fluorescent paint. It is made from daylight fluorescent pigments and an organic resin. Simglo-440 can be used on steel and fiberglass substrates that require a high visibility paint such as aircraft, navigational aids, safety marking, fire protection, traffic control, boats, buoys, docks, and life-saving equipment. It can be used for outdoor advertising signs, painted bulletins, store signs, truck signs, and trade exhibits.

GENERAL APPLICATION INSTRUCTIONS:

UNDERCOAT: Simglo fluorescent paints are semitransparent and, therefore, brightest when applied over a clean white surface. White semi-gloss enamels, white enamel undercoats, primer-sealers and bulletin blackout whites are ideally suited for this purpose. Over old finishes, apply a white undercoat or primer that offers good adhesion to both the old finish and new Simglo paint. However, best performance can be achieved by removing old finishes and starting with a freshly primed surface.
